

AMRIT NARAYAN SHRESTHA

Full-Stack Developer

✉ keshwor12@gmail.com ☎ +977 98444201558 📍 Nakhu Dobato, Lalitpur, 🌐 github.com/Johnihb

PROFESSIONAL SUMMARY

Full-stack developer and BIT student who independently designs, builds & ships production-grade web applications across the MERN and Next.js ecosystems from relational data modeling and REST API design to authentication and AI/LLM integration (Groq, Gemini). Comfortable owning a project end-to-end, from architecture through deployment.

SKILLS

JavaScript

TypeScript

HTML5

CSS3

React.js

Next.js

Tailwind CSS

shadcn/ui

TanStack Query

Node.js

Express.js

REST APIs

PostgreSQL

MongoDB

Prisma ORM

Mongoose

Leaflet.js

Vapi.ai (Voice AI)

Git

GitHub

Better Auth

Clerk

Cloudinary

Twilio

PROJECTS

Nepal Horizon — E-Tourism Booking Platform (Jun 2026) [GitHub](#)

Next.js · TypeScript · Express · Prisma · PostgreSQL

- Architected a full-stack booking platform with independently deployable frontend and backend services to manage users, travel packages, and bookings.
- Implemented session-based authentication and role-based access control (Better Auth) to separate user and admin workflows, and modeled relational data to support analytics-driven reporting.

AI Interview Platform (Sep 2025) [GitHub](#)

Node.js · Express · MongoDB · React · Gemini

- Engineered an AI-driven interview preparation platform that parses uploaded resumes and generates role-specific interview questions using Google Gemini.
- Developed an automated evaluation engine that scores candidate answers and resumes, providing structured feedback and a suggested rating.

Dentabot — AI-Powered Dental Appointment Platform (Jan 2026 — Feb 2026) [GitHub](#) | [Demo](#)

Next.js · TypeScript · PostgreSQL · Vapi.ai

- Shipped a full-stack appointment booking platform live in production, serving 50+ concurrent users.
- Integrated Clerk authentication with role-based access and a Vapi.ai voice assistant for automated patient consultations.
- Developed a responsive UI with 30+ reusable components (shadcn/ui, Tailwind CSS) and automated email confirmations via TanStack Query.

Emergen — Emergency Services Platform (Oct 2025 – Feb 2026) [GitHub](#) | [Demo](#)

Next.js · PostgreSQL · Twilio · Leaflet.js · Vapi.ai

- Designed and developed a Next.js emergency response platform featuring GitHub & Google OAuth and Twilio SMS verification for secure, fast account access during emergencies.
- Implemented real-time location tracking with interactive Leaflet.js maps, integrated a voice assistant (Vapi.ai) to consult the user, and developed RESTful APIs for emergency contact management.

EDUCATION

Aryan School of Eng , Bachelor of Information Technology (BIT)

2023 – 2027
